Porcelain Step

seranit

## Creative Solution for stairs: **Seravista**

Seravista steps are produced by reshaping the porcelain tiles in the Seranit Porcelain portfolio as step profiles. Seravista enables to create a material integrity between spaces by providing usage of floor and wall tiles on steps too.

Seravista steps are durable and easy to apply, and have a wide range of usage, from high-traffic outdoor areas to indoor spaces. Steps are produced in 32 cm width and 120 cm length and are easily installed by cutting according to the dimensions of the step. Along with the steps, risers and skirting can also be cut according to size requirements, enabling steps to be completed quickly with perfect detail.

All the technical features of the innovative and high tech Seravista steps are exactly the same as Seranit porcelain tiles. Porcelain steps have technical features, such as stain resistance, strength, low water absorption, durability and longevity. All porcelain samples included in the Seravista application portfolio are available for usage. Continuity could be achieved during the vertical circulation of porcelain floored spaces by using a cohesive palette of styles.

## Step

<b>A</b>	Net Length	
	1200 mm* / 1208 mm*	48"

<b>B</b>	Width	
	325 mm	12,80"

<b>C</b>	Width	
	345 mm	13,40"

<b>D</b>	Front Edge	
	50 mm	1,96"

Thickness		Açı
11.0 mm	0,43"	65"

Apart from above listed standard size step, on request special size steps are also cut from the standart steps.

Step is available only as matt and lappato surface finished.
